SELF-LUBRICATING LOAD-BEARING COMPONENTS MADE FROM VERTON® AND PTFE COMPOSITE FOR EXCEPTIONAL STRENGTH AND ABRASION RESISTANCE

FITS STANDARD 26" WHEEL FIXED FRAME MOUNTAIN BIKES

Shockster

FXC 3.5

If you're thinking about sending your hardtail to that big singletrack in the sky just because you wanted a full-suspension bike, reconsider.

Introducing **Shockster**®, the only add-on rear suspension system on the market.

Install **Shockster**® on your hardtail and you'll get all the speed, comfort and control that you expect from a full-suspension bike. And, like the best full-suspension designs, our **Active Pivot Suspension**® eliminates pogoing while remaining fully active.

Shockster® gives you 3.5" of travel whether you're in or out of the saddle. And your hardtail will retain its lateral stiffness because it attaches directly to your frame.

So, resurrect your hardtail.

And keep your dialed-in companion on the trail instead of under it.
